

FCC,

I just wanted to express my feelings about my XM Satellite radio. I absolutely am in love with my XM. I don't think I could survive without it. The constant traffic in the morning let's me know exactly how i should get to work. And I don't have to listen the regular radio and wait forever until traffic comes on. I always have the CNN channel on for up to date news. I love listening to the NASCAR races on Sunday's while I work in the garage. The fact the there is so much variety without commercials is well worth the money that I choose to pay for it. I would pay even more than that if I had to. I don't want someone telling me what I can and can't listen too. Please hear our voices and reject the NAB's petition 04-160. I think XM radio makes a difference in people's lives. Thank you for your time.

Heather Tracey
